I am a Motivated Software Engineer with hands-on experience in building responsive web applications using HTML, CSS, JavaScript, React and Django. Passionate about both frontend and backend development, with a focus on clean code, user experience, and problem-solving. Skilled in using Git, working with REST APIs, and collaborating remotely through tools like Google Meet. Eager to learn, contribute to real-world projects, and grow as part of a global development team.

Skills

Technical skills

Languages & Frameworks: HTML | CSS | JavaScript | Python | Django | Django REST Framework | React.js .

Web Development: Responsive Design | REST APIs | JSON | DOM Manipulation | Local Storage | JWT Authentication.

Databases: SQLite | PostgreSQL

Version Control: Git | GitHub.

Debugging & Testing: Debugging | Postman .

Tools and Platforms

Visual Studio Code | Render | Vercel | Postman | Docker | GitHub Actions (CI/CD) | Google Meet | Zoom.

Soft Skills

Self-motivated learner | Strong problem-solving skills | Attention to detail | Good communication | Team collaboration | Adaptability | Fast learner & continuous improvement mindset.

Education and Experience

Self-motivated software engineer

Aug2024-present

Agriprice website

- Built a responsive informational website using React.js and CSS, deployed live on local-market-website.vercel.app.

Github: <https://github.com/Nice-91/agriprice-info-site>

- Developed a Django REST API backend with PostgreSQL, deployed live on <https://agriprice-backend.onrender.com> to manage data and provide API endpoints.

Github: <https://github.com/RuthNzikwikiza/agriprice-backend>

- Developed a modern, responsive frontend with [React.js](https://reactjs.org/), and css focusing on clean UI components, responsive design, and dynamic data rendering.”

Live: (in progress)

GitHub: <https://github.com/Nice-91/Agriprice-UI>

Movie App

- Collaborated with a partner to build a responsive movie discovery platform.
- Developed interactive UI components using **REACT** and **CSS**.
- Integrated external APIs to fetch and display real-time movie data.
- Built a responsive UI and deployed live on Vercel.
